

# Seasonal Sewer Consumption/Billing Information

During the summer months, the Village utilizes seasonal consumption (usage) to determine **residential** sewer consumption. The philosophy behind this is that during the summer months residential properties are using water to fill pools, water plants, grass, etc. That water is not discharged into the Village's sewer system and therefore you should not be charged sewer charges for that water.

## **How is Seasonal Consumption Determined?**

The Village utilizes a three-year "look back" to determine your highest average consumption during winter/cold months. For this current quarter, the Village "looked back" at the following date ranges and used the highest average consumption from these date ranges to calculate this quarter's sewer consumption.

1. 11/01/2020 – 03/01/2021
2. 11/01/2019 – 03/01/2020
3. 11/01/2018 – 03/01/2019

## **Why Does My Bill Show the Same Consumption for both Water and Sewer?**

The Village only bills seasonal consumption for Residential accounts, not commercial or industrial. Additionally, if your calculated seasonal sewer consumption was greater than or equal to the current quarter's water consumption, we billed sewer services at this quarter's actual water consumption.

## **What Quarters Are Seasonal Consumption Billed?**

3<sup>rd</sup> quarter (which covers June – August) are the only months in which the Village utilizes seasonal consumption.

## **Who Can I Contact for More Information?**

You can contact Village Hall at 262-783-2525 or email Village Administrator Kayla Thorpe at [kthorpe@butlerwi.gov](mailto:kthorpe@butlerwi.gov) for more information.
